

BALL BEARING CAM CLEATS

Removes the risk of accidental release

Actual size

Engage, hold, release rope easily under load

Nothing beats Harken Industrial™ ball bearing cam cleats for a secure grip. Cleat engages rope with a downward snap of the wrist, keeps it where you put it, and releases quickly — even under high loads. Ideal for material handling and for use in exercise equipment and theatrical industries.

Stainless eyestraps, colored Flairleads, fairleads, and cam cleats guide rope, with some releasing and recleating up to 90 degrees; adapter plates ensure optimal cleating heights; wedge kits and risers improve cam angles.

Protective tooth design

Each rope size is held securely by the most number of teeth which squeeze, rather than cut into the rope, greatly reducing wear.

Engage and release easily

Cam cleats engage under maximum tension, hold securely, and release instantly under load. Multiple rows of UV-stabilized ball bearings reduce friction. The cam's V-shape guides rope for easy entry.

Materials for different load ranges

Hard Lube-anodized aluminum or stainless steel for high loads. Also available in lightweight, UV-stabilized composite for low-load applications. Contact Harken Industrial for more information.

Part No.	Description	Rope Ø				Fasteners		Max rated load		Breaking load	
		in	mm	in	mm	in	mm	lb	kN	lb	kN
468	Micro aluminum cleat	3/32	2	1/4	6	#8 RH	4 RH	150	0.7	400	1.8
150	Standard aluminum cleat	1/8	3	1/2	12	#10 FH	5 FH	200	0.9	750	3.3
